

Help Your Employer Sponsor Your PE Prep

A manager-ready overview for engineers seeking professional development support for the Mechanical PE HVAC or Thermal & Fluids exam.

Asking for PE prep support is a normal professional development request.

Your PE license benefits you and your firm. A structured prep program helps turn that goal into a clear, approvable investment.

Dan Molloy, PE

Instructor and course creator. Mechanical PE Exam Prep helps working engineers prepare for licensure with structured content, practice problems, video solutions, and support.

1

Choose your course

Pick the PE HVAC or PE Thermal & Fluids Full Access Bundle.

2

Send this overview

Forward the PDF or copy the manager email below into your internal request.

3

Request documentation

Email Dan if your employer needs a quote, invoice, or vendor details.

Why this helps the employee

- A structured path reduces guesswork and wasted study time.
- Practice problems and video solutions make the exam content easier to work through.
- Office hours and accountability support help with consistency while working full time.
- Passing the PE supports long-term career growth and confidence.

Why this helps the firm

- PE licensure strengthens the firm's licensed technical capacity.
- Supporting licensure reinforces retention and employee development.
- Better-prepared engineers become more valuable to project teams.
- A defined prep program is easier to approve than an open-ended reimbursement request.

What the Full Access Bundle includes

- Structured prep for the selected Mechanical PE discipline
- Detailed video solutions
- Live office hours
- Original exam-style practice problems
- Downloadable supporting materials
- Accountability support with Dan Molloy, PE

Copy/paste email to your manager

Subject: Request for PE exam prep support

Hi [Manager Name],

I am preparing for the Mechanical PE exam and would like to ask whether the company can support Mechanical PE Exam Prep's [HVAC / Thermal & Fluids] Full Access Bundle as professional development.

The program includes structured prep content, practice problems, video solutions, office hours, and accountability support from Dan Molloy, PE. Earning my PE license would support my growth as a mechanical engineer and increase the licensed technical capacity of our team.

Would this be eligible for reimbursement or direct purchase through our professional development budget?

Need a quote for your employer?

Email Dan with your name, company, exam discipline, course requested, and whether your employer needs a quote, invoice, vendor information, or receipt after purchase.
